## Tarea 18

Problemas 2, 3 y 7, sección 3.9.

Problema 1 (Problema 2). Prove that

- 1.  $x^2 + x + 1$  is irreducible over F, the field of integers mod 2.
- 2.  $x^2 + 1$  is irreducible over the integers mod 7.
- 3.  $x^3 9$  is irreducible over the integers mod 31.
- 4.  $x^3 9$  is reducible over the integers mód11.

Demostraci'on.

**Problema 2** (Problema 3). Let F, K be two fields  $F \subset K$  and suppose  $f(x), g(x) \in F[x]$  are relatively prime in F[x]. Prove that they are relatively prime in K[x].

Demostraci'on.

**Problema 3** (Problema 7). 7. If f(x) is in F[x], where F is the field of integers mod p, p a prime, and f(x) is irreducible over F of degree n prove that F[x]/(f(x)) is a field with  $p^n$  elements.

Demostraci'on.
